Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1-26 are found to be in condition for allowance.

Reasons for Allowance

3. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose creating a compatible analog signal which carries a digital video signal wherein a digital to analog formatter step responsive to a compressed video signal and providing the compatible analog signal carrying said compressed video signal as a quasidigital signal, which compatible analog signal may be utilized by said analog video system.

It is noted that the closest prior art of record Oku (US 6710817) teaches carrying video content that were previously carried on a digital video signal on the analog signal. The applicant, on the other hand, discloses carrying digital video signal on an analog signal. The applicant notes that "*quasidigital*" means an analog signal, which carries digital information in a fashion such that the signal amplitude is restricted to discrete
